## Planned Outage on March 11, 2014

Dear Member,

Your cooperative will be having an outage that will affect all customers of the South Beach substation on **Tuesday, March 11, 2014**. It will begin at 9 a.m. and should not last longer than two hours. Customers that are included in the outage are from the address of 1820 South Shore Drive (entrance to Island Oaks) all the way to the south end of the town of Topsail Beach (Serenity Point).

The work being done will include replacement of the main transmission transformer located in the Topsail substation which is the source for the South Beach Substation. A back-up transformer, in the event the main transformer ever fails, will also be installed. This back-up equipment will greatly decrease the amount of time needed to restore power if such a major equipment failure should take place.

Thank you for your understanding and patience as we upgrade this equipment in our continued effort to provide you with the most reliable electric service possible.

Sincerely,

J. Ronald McElhenny  
Chief Executive Officer

Town Of Topsail
