

## Post and Rope Pathways

The Town has installed Post and Rope Pathways at 4 public accesses. The Division of Coastal Management has approved these pathways as an alternative to traditional wooden crossovers that are not permissible at this time. We have also placed a beach mat at the Davis Ave access. We invite you to visit one of the four locations and would appreciate your feedback on both the pathway and beach mat. The four sites are: Queens Grant North, Rocky Mount, Davis Avenue (pictured), and Smith Avenue.

**\*Please note that these are only test sites and cannot be installed at private crossovers until the Town has completed the dune vegetation project set to begin early August.**
